Professional Profile

I am Luka Spadavecchia, a full-stack developer passionate about web development and creating efficient technological solutions. With experience in technologies such as JavaScript, React, Node.js, Python, Django, Java, SQL, and DevOps, I have specialized in both client-side and server-side projects. My focus is on delivering high-quality products, optimized to meet the needs of end users and businesses. I am always eager to learn and adapt to new technologies, seeking to contribute my experience in dynamic and challenging environments, where teamwork and innovation are key. Additionally, I have experience working in startup environments and implementing agile methodologies like Scrum.

Work Experience**Voolkia Software and Services**
